## CHAPTER 1

### LAPLACE TRANSFORMATION

1.1	Definition .....	7-1
1.2	Examples .....	7-1
1.2.1	Example 1 — $f(t) = u(t)$ .....	7-1
1.2.2	Example 2 — $f(t) = e^{at} u(t)$ .....	7-2
1.3	Laplace Transform Properties .....	7-2
1.3.1	Linearity Properties .....	7-2
1.3.2	First Translation (Shifting) Property .....	7-2
1.3.3	Real differentiation .....	7-3
1.3.4	Real Integration .....	7-3
1.3.5	Change of Scale .....	7-5
1.3.6	Multiplication by $t^n$ .....	7-5
1.3.7	Division by $t$ .....	7-6
1.3.8	Second Translation (Shifting) Property .....	7-6
1.3.9	Periodic Functions .....	7-7
1.4	Inverse Laplace Transforms .....	7-7
1.5	Properties of the Inverse .....	7-7
1.5.1	Linearity Property .....	7-7
1.5.2	First Translation (Shifting) Property .....	7-7
1.5.3	Change of Scale .....	7-8

1.5.4	Second Translation (Shifting) Property .....	7-8
1.5.5	Inverse of a Derivative .....	7-9
1.5.6	Inverse of Integrals .....	7-9
1.5.7	Multiplication by $s$ .....	7-10
1.5.8	Division by $s$ .....	7-10
1.6	The Method of Partial Fraction Expansion .....	7-11
1.7	Examples of Partial Fraction Expansion .....	7-12
1.7.1	Example 1 — Repeated Roots .....	7-12
1.7.2	Example 2 — Numerator Power Equals Denominator Power .	7-12
1.7.3	Example 3 — Delay Terms .....	7-13
1.7.4	Example 4 — Complex Roots .....	7-14
1.8	Laplace Transform Solution of Differential Equations .....	7-14
1.9	Examples of Laplace Transform Solution of Differential Equations ....	7-14
1.9.1	Example 1 — Second Order Differential Equation .....	7-14
1.9.2	Example 2 — Simultaneous Differential Equations .....	7-15
1.9.3	Example 3 — Integral Differential Equations .....	7-16
1.10	Initial and Final Value Theorems .....	7-16
1.11	Laplace Transform in Network Analysis .....	7-17
1.12	Examples of Laplace Transform in Network Analysis .....	7-17
1.12.1	Example 1 — RL Network .....	7-17
1.12.2	Example 2 — RLC Network .....	7-19
1.13	Proofs of Laplace Transform Properties .....	7-20
1.13.1	First Translation (Shifting) Property .....	7-20
1.13.2	Real Differentiation .....	7-20
1.13.3	Real Integration .....	7-20
1.13.4	Change of Scale .....	7-21
1.13.5	Multiplication by $t^n$ .....	7-21
1.13.6	Division by $t$ .....	7-22
1.13.7	Second Translation (Shifting) Property .....	7-22
1.13.8	Periodic Functions .....	7-22
1.14	Homework .....	7-23
1.15	Solutions to Selected Homework Problems on Laplace Transform .....	7-29

## CHAPTER 2

### CONTROL SYSTEMS AND TERMINOLOGY

2.1	Block Diagrams .....	7-33
2.2	Electrical Networks .....	7-34
2.3	Translational Mechanical Networks .....	7-34
2.4	Relational Mechanical Networks .....	7-35

## CHAPTER 3 BLOCK DIAGRAM ALGEBRA AND SECOND ORDER SYSTEMS

3.1	Canonical Form .....	7-37
3.2	Block Diagram Transformation Theorems .....	7-38
3.3	Example of Block Diagram Transformation .....	7-40
3.4	Reduction of Multiple-Input, Multiple-Output Diagrams .....	7-42
3.5	Single Flow Graphs .....	7-44
3.6	Mason's Gain Rule .....	7-44
3.6.1	Example 1 — Transfer Function Evaluation Using Mason's Gain Rule .....	7-44
3.7	Second Order Systems .....	7-45
3.7.1	Rise time $T_r$ .....	7-48
3.7.2	Peak time $T_p$ .....	7-48
3.7.3	Setting Time $T_s$ .....	7-48
3.7.4	Peak Response $M_{pt}$ .....	7-48
3.7.5	Percent Overshoot P.O. ....	7-49
3.8	Example Problems .....	7-49
3.8.1	Example 1 — Evaluation of Frequency and Damping of Second Order Systems .....	7-49
3.8.2	Example 2 — Evaluation of Frequency and Damping of Second Order Systems .....	7-49
3.8.3	Example 3 — Evaluation of P.O., Rise Time and Settling Time .....	7-49
3.8.4	Example 4 — Adjustable Gain Calculation .....	7-49
3.8.5	Example 5 — Adjustable Gain Calculation .....	7-50

## CHAPTER 4 STABILITY ANALYSIS

4.1	Definition .....	7-51
4.2	Routh Stability Criterion .....	7-55
4.3	Adjustable Systems .....	7-56
4.4	Examples .....	7-56
4.4.1	Example 1 — Second Order System .....	7-56
4.4.2	Example 2 — Fourth Order System .....	7-57
4.5	Example Problems — Special Cases .....	7-57
4.5.1	Example 1 — Row of Zeroes .....	7-57
4.5.2	Example 2 — Zeroes in First Column .....	7-58
4.5.3	Example 3 — Unstable System .....	7-59
4.5.4	Example 4 — Finding Imaginary Axis Crossing .....	7-59
4.5.5	Example 5 — Unstable Systems .....	7-60
4.5.6	Example 6 — Negative Gain .....	7-60

## CHAPTER 5 PERFORMANCE SPECIFICATION

5.1	System Type .....	7-61
5.1.1	Example 1 — Finding System Type .....	7-61
5.2	Steady-State Error .....	7-62
5.3	Position Error (Step Error) .....	7-62
5.4	Velocity Error (Ramp Error) .....	7-63
5.5	Acceleration Error (Parabolic Error) .....	7-64
5.6	Steady-State Error Summary .....	7-65
5.7	Steady-State Error Example .....	7-65
5.8	Error Coefficients .....	7-66
5.9	Error Coefficient Examples .....	7-67
5.9.1	Example 1 — First Order System .....	7-67
5.9.2	Example 2 — Second Order System with Integrator .....	7-67
5.10	Sensitivity Analysis .....	7-67
5.11	Nominal Value .....	7-68
5.12	Open Loop .....	7-68
5.13	Closed Loop (Unity Feedback) .....	7-68
5.14	Closed Loop (Non-Unity Feedback) .....	7-69
5.14.1	Example 1 — Sensitivity Analysis .....	7-69
5.15	Sensitivity to Disturbance Signals .....	7-70

## CHAPTER 6 ROOT LOCUS ANALYSIS

6.1	Root Locus Analysis .....	7-71
6.2	Rules for Plotting Root Locus .....	7-72
6.3	Steps for Plotting Root Locus .....	7-73
6.3.1	Example of the Application of Plotting Root Locus .....	7-73
6.4	Gain Calculation .....	7-77
6.5	General Problems .....	7-78
6.5.1	Problem 1 — Construction of Root Locus Using Rules .....	7-78
6.5.2	Problem 2 — Special Case .....	7-81

## CHAPTER 7 FREQUENCY RESPONSE

7.1	Bode Plots .....	7-83
7.1.1	Forms of GH .....	7-84
7.1.2	Constant Transmittance .....	7-84
7.1.3	Roots at the Origin .....	7-85
7.1.4	Real Axis Roots .....	7-88
7.1.5	Second Order Systems .....	7-91
7.1.6	Example 1 — Bode Plots .....	7-93

7.2	Gain Crossover .....	7-95
7.3	Phase Margin .....	7-95
7.4	Phase Crossover .....	7-95
7.5	Gain Margin .....	7-96
7.6	Nyquist Diagram .....	7-97
7.7	Typical P. E. Problems .....	7-98
7.7.1	P. E. Problem 1 — Frequency Response .....	7-98
7.7.2	P. E. Problem 2 — Gain Margin/Phase Margin .....	7-99
7.7.3	P. E. Problem 3 — Frequency Response .....	7-101

## CHAPTER 8

### SELECTED CONTROL SYSTEMS PROBLEMS

8.1	Typical P. E. Problems .....	7-107
8.1.1	P. E. Problem 1 — Finding Gain, Rise Time, P.O. and Phase ..	7-107
8.1.2	P. E. Problem 2 — Find Gain and Phase Margins .....	7-109
8.1.3	P. E. Problem 3 — Steady State Errors .....	7-111
8.1.4	P. E. Problem 4 — Find Gain, Given P.O. and Peak Times ....	7-112
8.1.5	P. E. Problem 5 — Find Parameters Given $w_n$ , $\zeta$ , and Steady State Error .....	7-114
8.1.6	P. E. Problem 6 — Find Parameters Given $\zeta$ and $w_n$ .....	7-115
8.1.7	P. E. Problem 7 — State Variable Description .....	7-116
8.1.8	P. E. Problem 8 — Find Damping, P.O., $T_r$ , $T_s$ , $w_n$ from Pole Locations .....	7-118
8.1.9	P. E. Problem 9 — Determine Stability and Steady State Error	7-120
8.1.10	P. E. Problem 10 — Operational Amplifier .....	7-122
8.1.11	P. E. Problem 11 — Digital Control System .....	7-125
8.1.12	P. E. Problem 12 — Digital Control System .....	7-127
8.1.13	P. E. Problem 13 — Digital Control System .....	7-128
